

BEST PRICE.

BEST PERFORMANCE. BEST SUPPORT.

Evolution OF THE Revolution

The Router Revolution continues to change the way people think about routers.

ImageStream recently introduced the industry's lowest cost DS3/E3 router, the Rebel, and the lowest cost OC3 router, the Gateway. These routers achieve industry leading price and performance using commodity PC components, off-the-shelf network cards, and Linux™

Our latest innovation is the new Gateway 64, which includes a 64-bit backplane and the fastest available Pentium 4 CPU card with dual buses that support a maximum throughput of 12 Gbps. The new Gateway 64 is the fastest ImageStream router yet, and it represents another ImageStream first as the world's lowest cost OC12 router.

COMPARE.

ATM OC12/STM4

Lowest cost OC12 router • 64-bit dual bus upgrade (8 + 4 Gbps) • One ATM OC12 port (single mode) • One gigabit ethernet port (single mode) • Firewall, line bonding & VPN

Compare to **Cisco® 7507/8-MX** at **\$82,295** with port adapters, SmartNet® & IOS®

\$21,895

- **Best Software** Our Enterprise Linux™ router distribution has everything you need to deploy advanced network applications including secure shell, menu-based configuration, real-time monitoring, IP firewall, bridging, interface bonding, dynamic routing, QoS, IPsec VPN, and many other features such as free software upgrades for life.

ATM OC3/STM1

Lowest cost OC3 router • One ATM OC3 port (multimode) • Two 10/100 ethernet ports • One gigabit ethernet port (multimode) • Firewall, line bonding & VPN

Compare to **Cisco® 7204VXR/CPE** at **\$37,220** with port adapters, SmartNet® & IOS®

\$7,245

- **Best Support** ImageStream routers include a full year of free 24/7 support. When you consider total cost of ownership, ImageStream routers cost less up front and over the long haul.

ATM DS3/E3/J2

One ATM DS3/E3 port • Two 10/100 ethernet ports • Firewall, line bonding & VPN

Compare to **Cisco® 7204VXR/CPE** at **\$26,520** with port adapters, SmartNet® & IOS®

\$6,379

- **Guaranteed Performance** Our 31-day performance guarantee ensures your router will function as promised. If your ImageStream router does not work as specified in writing, and technical support cannot correct the problem, you can return your router for a full refund of the purchase price. See our web site for details.

CPU & Bus Options
Processor and backplane options provide additional bandwidth for demanding applications.

Secure Access
A lockable access door provides extra security for the power switch.

Room to Grow
12 PCI slots allow for plenty of expansion using the complete line of Industrial Series cards.

Optional Power
Optional redundant power supplies make this highly reliable router even more robust.
